

For over 15 years, **Symposit LLC** has enabled over 30,000 personnel located in 50 states and 10 countries to achieve their work and mission by delivering IT that is available, secure, and cost-efficient. We help our clients save money, time, and frustration by implementing and managing technology solutions that increase productivity, decrease risk and drive growth. We have helped U.S. Federal Government, State, and Local Governments, Defense Contractors, Healthcare providers, and numerous other clients in a variety of industries. Though we provide a range of IT services, our ADOMS model (Assess, Deploy, Optimize, Modernize, Secure) remains our core competency. As a small and agile business, we provide a highly responsive workforce and maintain little overhead, thus saving our clients at least 30% or more in monthly IT costs compared to large businesses - need more proof? [Check out a comparison from GSA CALC.](#)

## Sample Past Performance

### U.S. Tax Court (USTC) - Prime

IT Modernization / Operations & Maintenance  
 Washington, D.C. – May 2021 to Present

Symposit has been performing an overhaul modernization effort to upgrade the USTC system and network infrastructure, to include decommissioning of legacy equipment and implementation of networking monitoring, migrating workloads to Cloud, infrastructure-as-a-code (IaaS), DevSecOps, Software Defined Networking (SDN), vulnerability remediation, cybersecurity hardening, incident planning and response.

### U.S. Food and Drug Administration (FDA) - Sub

IT Customer Support Services (CSS)  
 Silver Spring, MD – 2015 to Present

Symposit has been on the FDA Customer Support Services (CSS) contract, providing a service desk staffed by trained help desk analysts & technicians to support the agency's over 25,000 users in CONUS/OCONUS with Tier 1 and Tier 2 technical issues. We assist users with network issues, VPN connectivity issues, and triage any other IT and technology related issues. Our analysts handle over 500 tickets daily.

### U.S. Department of Agriculture (USDA) OCIO - Prime (JV)

Capital Planning and Investment Control (CPIC), Enterprise Architecture (EA), Technology Business Mgmt (TBM), IT Governance (ITG)  
 Washington, D.C. – Nov 2023 to Present

Symposit-HumanTouch JV 1 provides senior level expertise in Business Process Engineering (BPE), Strategic and Organizational Planning, Capital Planning and Investment Control (CPIC), IT Governance Management, Data Analytics, Agile Methodologies, Earned Value Management (EVM), Technology Business Management (TBM), Portfolio, Program, and Project Management, Technical/Policy Writer, Federal Acquisition Regulations (FAR), Internal Controls and Change Management, and the FITARA Management Maturity Model.

### U.S. Nuclear Regulatory Commission (NRC) - Sub

Safeguards LAN and Electronic Safe (SLES)  
 Rockville, MD – 2009 to 2021

Performed cybersecurity, systems/network engineering, operations & maintenance, and help desk support for the Secure LAN and Electronic Safe system (SLES). Symposit led a modernization effort for this Primary Mission Essential system, which includes virtualization, network upgrades, major application upgrades and COOP/COG components. This secure network operates throughout CONUS, supporting over 1000 users and 60 nuclear power plants in 30 states. Finally, Symposit consolidated 2 Datacenters (per OMB directive) greatly ahead of schedule.

### Department of State / International Narcotics and Law Enforcement Bureau (DoS/INL) - Prime

Information Management Advisory Consulting (IMAC)  
 Washington, D.C. – 2020 to 2021

Symposit was selected to provide to provide technical support for the Information Management Advisory Council. Symposit is proud to support INL's critical mission to reduce the entry of illegal drugs into the US and to minimize the impact of transnational crimes on the US and its citizens.
